

## Darshan Chudasama

I am seeking greater responsibility where I can expand my knowledge and apply my logical skills to solve complex problems in the field of software engineering. In my current role, I have implemented a student management system and resolved several complex issues within the project.

### Tech. Stack

PHP, HTML, CSS, MYSQL, javascript, Android (Java), Bootstrap, XAMPP, Laravel.

### Project

- Student Management System (Sem-6 Project)

This project manages all queries related to student information, including admission fees, tuition fees, and more. Students can access comprehensive information about the college through this website. It efficiently handles both student and teacher information and covers all functions related to the college. Students can visit the website to get basic information and updates.

- Portfolio

This website introduces me and displays all my personal information including details about my programs. It also features information about my social media accounts. The website is my information.
